

ASHI Laboratory Manual Edition 4.2

Table of Contents

VOLUME II: Molecular Testing, Flow Cytometry and Quality Assurance

V. MOLECULAR TESTING

A. DNA ISOLATION

HLA Class I and Class II DNA Extraction Methods	V.A.1.1
<i>Carol Kosman</i>	

B. DESIGN AND LABELING OF PRIMERS AND PROBES

Deborah O. Crowe

Overview	V.B.1.1
Use of Primers With SSP Methods	V.B.1.3
Preparation of Primer and Probe Solutions	V.B.1.3
Target DNA	V.B.1.4
Nucleic Acid Labeling	V.B.1.4
Incorporation of Modified Nucleotide Triphosphates (NTP or dNTP)	V.B.1.5
Digoxigenin Labeling for SSOP	V.B.1.6
Labeling of Double Stranded DNA (Nick and Random)	V.B.1.8
Non-isotopic Labeling.	V.B.1.9
Detection Methods	V.B.1.11

C. HLA TYPING

PCR-SSP Typing of Class I and Class II Alleles.	V.C.1.1
<i>Mike Bunce and Ken Welsh</i>	
PCR-SSOP, Class I and Class II (DRB1)	V.C.2.1
<i>Derek Middleton</i>	
HLA-DPA1 and -DPB1 Typing Using the Polymerase Chain Reaction and Non-Radioactive Sequence-Specific Oligonucleotide Probes.	V.C.3.1
<i>Lori L. Steiner, Priscilla V. Moonsamy, Teodorica L. Bugawan and Ann B. Begovich</i>	
Analysis of HLA-Class II DRB1 Alleles Using PCR-RFLP	V.C.4.1
<i>Julio C. Delgado, Doreen E. Sese, Edgar L. Milford, and Edmond J. Yunis</i>	
Enzyme-Linked DNA Oligotyping Performed in Microtiter Plates (ELDOT)	V.C.5.1
<i>Aloke Mohinen and Marcelo Fernandez-Vina</i>	

HLA Typing using Reverse SSO and Luminex ^R Technology	V.C.5.2
<i>Jane Kearns, Erin Pierce, Allison Nield, and Malek Kamoun</i>	
DNA Typing by PCR-SSOPH for HLA DR β and –DQ β 1 Using Biotest ELPHA (Enzyme Linked Probe Hybridization Assay) Kits	V.C.5.3
<i>Karen L. Pierce</i>	
HLA Typing by Reference Strand Mediated Conformation Analysis (RSCA) using the Pharmacia ALF Express Sequencer	V.C.5.4
<i>Deborah Crowe</i>	
HLA-A, B, C, DRB1 and DQB1 SSO Line Strip Typing with the Dynal RELI TM System	V.C.5.5
<i>Lois Regen, Georgena Wohlwend, Randy Williams, and Anajane Smith</i>	
SSOP Applications for Class II HLA Testing: Use of INNO-LiPA Reverse SSOP Method	V.C.5.6
<i>Christy C. Embrey, W. Paul Conn, Thomasa E. Cooper, and E. Victoria Turner</i>	
Commercial Vendors of Kits for Molecular Typing.	V.C.6.1
<i>Brian F. Duffy</i>	
Analysis of HLA Class I Alleles via Direct Sequencing of PCR Products	V.C.7.1
<i>Jin Wu, Sue Bassinger, Barbara B. Griffith, and Thomas M. Williams</i>	
HLA-DR Sequence-Based Typing	V.C.8.1
<i>Lee Ann Baxter-Lowe</i>	

D. POST TRANSPLANT MONITORING

Stem Cell Engraftment Analysis Using PCR Amplification of VNTR/STR Loci	V.D.1.1
<i>Anajane G. Smith and Chris McFarland</i>	

E. MISCELLANEOUS

Analysis of HLA Alleles Using the TaqMan Method.	V.E.1.1
<i>William A. Rudert and Massimo Trucco</i>	
Quantitation of Cytokines by Competitive PCR.	V.E.2.1
<i>Patrizia Luppi and Massimo Trucco</i>	
MHC Microsatellite Analysis	V.E.3.1
<i>Maureen P. Martin and Mary Carrington</i>	
KIR Genotyping by SSP	V.E.4.1
<i>E. Victoria Turner</i>	
MICA Allele-Level Typing by SBT	V.E.5.1
<i>Yizhou Zou, Mei Han and Peter Stastny</i>	

VI. FLOW CYTOMETRY

A. BASIC PRINCIPLES

Basic Principles and Quality Assurance of Immunofluorescence and Flow Cytometry.	VI.A.1.1
<i>Mary S. Leffell and Robert A. Bray</i>	

B. FLOW CYTOMETRY CROSSMATCH AND ANTIBODY DETECTION

Cell Based, Flow Cytometric Detection of Panel Reactive Antibody (FC-PRA): Set Up, Acquisition of Data & Analysis	VI.B.1.1
<i>Lisa Wilmoth-Hosey, Pam Chapman, Joan Holcomb, and Robert A. Bray</i>	
Antibody Detection by Flow Cytometry Using Antigen Coated Beads	VI.B.2.1
<i>Lisa Wilmoth-Hosey and Robert A. Bray</i>	
Antibody Identification by Flow Cytometry Using HLA Class I or Class II Antigen Coated Specificity Beads.	VI.B.3.1
<i>Lisa Wilmoth-Hosey and Robert A. Bray</i>	

Flow Cytometric T and B Cell Crossmatching	VI.B.4.1
<i>Charles Hamrick and Lauralynn Lebeck</i>	
Antibody Detection by Luminex ^R Using Antigen Coated Beads.	VI.B.4.2
<i>Walter Herczyk</i>	
DSA Assay: A Donor-Specific Solid-Phase Method for Detecting Anti-MHC Antibodies Using XMapTM (LuminexTM).	VI.B.5.1
<i>Patrick Adams and Nicholas DiPaola</i>	
Evaluation of the Flow Crossmatch Using the MESF (Molecules of Equivalent Soluble Fluorochrome) Method	VI.B.6.1
<i>Wayne Shumway</i>	

C. CELLULAR TYPING

Phenotyping by Immunofluorescence	VI.C.1.1
<i>Mary L. Duenzl, Linda Stempora, Robert A. Bray</i>	
HLA-B27 Typing By Flow Cytometry	VI.C.2.1
<i>Anne M. Ward</i>	
CD34 Enumeration	VI.C.3.1
<i>David Senitzer, Laima Gaidulis and Sarah Santos</i>	

D. MISCELLANEOUS

Flow Cytometric Detection of Intracellular Cytokine Production	VI.D.1.1
<i>Howard M. Gebel, John W. Ortegel, and Anat R. Tambur</i>	
Quantitative Plasma OKT3 Levels	VI.D.2.1
<i>Leah N. Hartung and Carl T. Wittwer</i>	

VII. QUALITY ASSURANCE

Note: This section is being repeated for the convenience of the user.

A. THE QUALITY ASSURANCE / IMPROVEMENT PROGRAM

Deborah O. Crowe

Overview	VII.A.1.1
Manual	VII.A.1.2
Forms.	VII.A.1.5
The Quality Assurance Report	VII.A.1.5
Process Improvement	VII.A.1.6
Benefits of a Quality Assurance Program	VII.A.1.6

B. QUALITY ASSURANCE OF INFORMATION / DATA IN THE LABORATORY

Lori Dombrowsky-Osowski

New Test Validation	VII.B.1.1
Patient Test Management	VII.B.1.2
Computer Validation	VII.B.1.4
Laboratory Data Maintenance	VII.B.1.4

C. FACILITIES AND ENVIRONMENT

Geoffrey A. Land

Physical Facilities	VII.C.1.1
-------------------------------	-----------

Biologic and Chemical Hazards	VII.C.1.6
Radiation Hazards	VII.C.1.13

D. QUALITY CONTROL PROGRAM

Anthony L. Roggero and Deborah O. Crowe

Principle/Purpose	VII.D.1.1
Proficiency Testing	VII.D.1.1
Reagent Quality Control	VII.D.1.1
Complement Quality Control	VII.D.1.3
Anti-Human Globulin Quality Control.	VII.D.1.3
Primer Quality Control for DNA Typing	VII.D.1.4
Probe Quality Control for DNA Typing	VII.D.1.5
Titration of FITC-Anti-Human IgG for Flow Crossmatching	VII.D.1.6
Equipment Maintenance	VII.D.1.6
Synthesis of Rare DRB1 Allele Sequences for Quality Control of SSOP	VII.D.2.1
<i>Debra D. Hiraki, Shalini Krishnaswamy, Carl F. Grumet</i>	
Quality Control for DNA Contamination	VII.D.3.1
<i>Jeffrey M. McCormack</i>	

E. REGULATORY AGENCIES

The Joint Commission of Healthcare Organizations	VII.E.1
<i>Anne Belanger</i>	
ASHI – The HCFA Perspective	VII.E.2
<i>Sandra Pearson and Esther-Marie Carmichael</i>	

VIII. APPENDICES

A. CONTRIBUTORS

B. STANDARDS

C. HLA ALLELES AND EQUIVALENT SEROLOGICAL TYPES
